(An Exploration Stage Company) Notes to the Condensed Interim Financial Statements Unaudited – Prepared by Management For the Nine Months Ended December 31, 2022 and 2021

1. NATURE OF OPERATIONS AND ABILITY TO CONTINUE AS A GOING CONCERN

Pacific Empire Minerals Corp. (the "Company") was incorporated on July 13, 2012, under the Business Corporations Act (British Columbia). The Company's principal business activities are the acquisition and exploration of mineral properties in Canada. The Company's common shares are listed on the TSX Venture Exchange ("TSX-V") under the symbol "PEMC". The Company's head office address is at Suite 804, 525 Seymour Street, Vancouver, British Columbia V6B 3H7, Canada and its registered and records office is located at Suite 1700, 1055 West Hastings Street, Vancouver, British Columbia V6E 2E9, Canada.

These condensed interim financial statements have been prepared using International Financial Reporting Standards ("IFRS") applicable to a going concern, which assumes that the Company will be able to realize its assets, discharge its liabilities and continue in operation for the following twelve months.

Realization values may be substantially different from the carrying values shown and these condensed interim financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern. The Company's continuing operations and the ability of the Company to meet mineral property and other commitments are dependent upon the ability of the Company to continue to raise additional equity or debt financing and to find joint venture partners. At the date of these financial statements, the Company has not identified whether any of its properties contain ore reserves that are economically recoverable. At December 31, 2022, the Company has not achieved profitable operations and has accumulated losses since inception.

As at December 31, 2022, the Company had working capital of \$501,045, accumulated deficit of \$6,392,132 and cash of \$284,710. With its current plans for the year and the budgets associated with those plans, in order to continue funding its administrative and exploration expenditures from the date of these financial statements, the Company will need to obtain additional cash and anticipates either financing or selling one or more of its assets. These material uncertainties may cast significant doubt upon the Company's ability to continue as a going concern.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

In addition, these financial statements have been prepared using the accrual basis of accounting except for cash flow information. These financial statements are presented in Canadian dollars ("CAD"), which is also the Company's functional currency.

13. SEGMENTED INFORMATION

The Company operates in a single reportable operating segment, being the acquisition and exploration of mineral properties. As such, all of the Company's property and equipment and exploration and evaluation assets are located in Canada.

14. FINANCIAL AND CAPITAL RISK MANAGEMENT

Financial Risk Management

The Company's financial instruments are exposed to certain financial risks, which include currency risk, credit risk, liquidity risk, interest rate risk, and market risk.

Currency Risk

The Company is exposed to the financial risk related to the fluctuation of foreign exchange rates. Although the Company operates only in Canada and all expenditures are incurred in Canadian dollars, U.S. dollars are sometimes held by the Company. As at December 31, 2022, the Company did not hold a significant balance of U.S. dollars. Therefore, a change in the currency exchange rates between the Canadian dollar relative to the U.S. dollar would

14. FINANCIAL AND CAPITAL RISK MANAGEMENT (Continued)

have an immaterial effect on the Company's results of operations, financial position or cash flows. The Company has not hedged its exposure to currency fluctuations.

Credit Risk

Credit risk arises from cash as well as credit exposures to counterparties of outstanding receivables and committed transactions. There is no concentration of credit risk other than on cash deposits and receivables. The Company's cash deposits are primarily held with a Canadian chartered bank. Further, receivables comprise amounts due from the federal government. Therefore, credit risk is considered low.

Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash and the availability of funding through an adequate amount of committed credit facilities and the ability to pay obligations as they fall due. Financial liabilities, at December 31, 2022, included \$27,199 of accounts payable and accrued liabilities, \$25,825 in amounts due to related parties and \$21,396 of current lease liabilities. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

Interest Rate Risk

When the Company has sufficient cash, it will invest in term deposits which can be reinvested without penalty after thirty days should interest rates rise. As at December 31, 2022, the Company did not have any interest-bearing loans. Accordingly, the Company does not have a significant interest rate risk.

Market Risk

The Company is exposed to market risk because of the fluctuating values of its publicly traded marketable securities. The markets in which the Company holds equity investments are subject to volatility and price changes. The Company has no control over these fluctuations and does not hedge its investments. Based on the December 31, 2022 value of marketable securities a 10% increase or decrease in the share prices of these companies would have an immaterial impact on loss and comprehensive loss.

Management of Capital

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its mineral properties. The Company relies mainly on equity issuances to raise new capital and on entering into joint venture agreements on certain properties which enables it to conserve capital and to reduce risk. In the management of capital, the Company includes the components of shareholders' equity. The Company prepares annual estimates of exploration and administrative expenditures and monitors actual expenditures compared to the estimates. The Company's investment policy is to invest its cash in savings accounts or highly liquid short-term deposits with terms of one year or less and which can be liquidated after thirty days without interest penalty. There have been no changes in the approach to managing capital during the nine months ended December 31, 2022. Management believes that it may seek additional capital to continue its exploration programs and general and administrative costs. The Company is not subject to externally imposed capital requirements.

Fair Values

The Company characterizes inputs used in determining fair value using a hierarchy that prioritizes inputs depending on the degree to which they are observable. The three levels of the fair value hierarchy are as follows:

- Level 1: inputs represent quoted prices in active markets for identical assets or liabilities. Active markets are those in which transactions occur in sufficient frequency and volume to provide pricing information on an ongoing basis.
- Level 2: inputs other than quoted prices that are observable, either directly or indirectly. Level 2 valuations are based on inputs, including quoted forward prices for commodities, market interest rates, and volatility factors, which can be observed or corroborated in the marketplace.
- Level 3: inputs that are less observable, unavoidable or where the observable data does not support the majority of the instruments' fair value.

As at December 31, 2022, there were no changes in the levels in comparison to the year ended March 31, 2022.

Financial instruments which are measured using the fair value hierarchy include marketable securities, which are categorized as Level 1.

The carrying values of cash, restricted cash, receivables, reclamation deposits, accounts payable and accrued liabilities and due to related parties approximate their fair value because of the short-term nature of these instruments.
